

ALLERGEN CHART

Our kitchen creates menu items containing dairy, butter, soy, eggs, fish, nut, and tree nut. While we take steps to prevent cross-contamination, we cannot guarantee that any of our products are safe to consume for people with allergies such as soy, dairy, butter, egg, fish, nut, and tree nut allergies. This Allergen Chart identifies ingredients which may cause allergic reactions. Our food production staff has been trained on the protocols for safe food allergen preparation, however, there is always a risk of cross-contamination, and a possibility that manufacturers of the commercial foods we use could change a formulation without notice to us. Phil's BBQ will not assume any liability for adverse reactions to food consumed, or items one may come into contact with, while eating our menu items. Customers with food allergies should request to speak with a Restaurant Manager for assistance or contact us at EmailUs@PhilsBBQ.com for more information.
