The Burns Pub & Restaurant

WHISK(E)Y & SPIRITS

May 16th, 2024

CURATED BY: JONATHAN ODDE

About Our Whisky Selection

This is not the largest selection in Colorado, or even the largest in the Denver-metro area. We simply don't have the space. But honestly, that's not what drives us. Each whisky is selected based on quality, uniqueness, and of course in a few cases, marketability. You will find knowledgeable experts on hand to help you select a truly satisfying spirit, so please feel free to call on one for recommendations, questions, or simply to chat. It's just what we do here.

How Your Whisky is Served

All of our whiskies, when not ordered in a cocktail, are served neat with a pipette of filtered water. It's assumed that you ordered the whisky to sip and allow the spirit to serenade you with the nuances and complexities the years of aging is intended to provide. Therefore, they are not served with ice (unless specified) as ice considerably restricts aroma, flavor and character. Likewise, they are not served as shots (unless specified) for essentially the same reason. With this in mind, if you wish to use ice or "shoot it", please specify this to your server.

Our Current Burns Pub Single Barrel Selections are:

New Riff Cask Strength Bourbon; Brown Sugar, Caramel and Roasted Almonds... 58.2% ABV Barrel # 18504

LAWS Whiskey House Rye; Carroway, Brown Bread, and Vanilla... 47.5% ABV Barrel # 837

Single Malt Scotch

"Single Malt Scotch" means the product of one distillery (Single) from 100% malted barley (Malt). Like all Scotch, it must be distilled, aged (at least three years), and bottled in Scotland.

Campbeltown

The only region that is just one small town, Campbeltown was a hotbed of illicit distilling and boot-legging before it was legalized in Scotland in 1823. At one time there were 30+ distilleries in a seaside town with a population of around two thousand people, solidifying it's claim as the "Victorian Era Whisky Capital of the World". All that changed in the early 1900s when quality declined, prohibition hit the United States, and other factors caused distilleries to close their doors for good in the 1900s-1930s. Campbeltown as a region was in danger of extinction from the whisky landscape. But Hedley Wright (owner of Springbank at the time) virtually single handedly reversed Campbeltown's dismal fate. Perhaps wiser from the suffering, Campbeltown now produces some of the finest whiskies in the world once again.

Highlands

The Highlands is separated from the Lowlands by a belt line that runs from Helensburgh to Stonehaven. The separation is a result of English taxation (in the form of the Wash Act and Excise Act in the 1780s) and not a difference in styles, although the effects of the implementation of the act lead to a style variance. Effectively, they imposed heavier regulations on production in the Highlands at a lower tax rate than in the Lowlands. The end result was a large number of illicit distilleries in the Highlands. So it didn't work out exactly as intended.

Islands

The Island "style" is eclectic, and often many styles are produced from one distillery. Of course there are exceptions as some distilleries have cultivated a style they are known for. But the range is great, from lighter, fruitier expressions, to rich, often peated expressions. If there is a thin thread, it's that they tend to be slightly briny.

Islay

Islay is known for it's rich, smoky and coastal malts. This is no coincidence as the island has very few trees and is essentially a giant peat bed. Not all Islay whiskies are peated though. But with a rich history of distilling here that dates back long before the Wash Act, the mystique and devotion to Islay's smoky malt is arguably unparalleled in any type of alcoholic beverage. And with nine distilleries and counting, that devotion is not likely to fade anytime soon.

Lowlands

The Lowland region was created by taxation, as it was less regulated but taxed more as it was easier to reach in the days before the rails were introduced. One of the earliest areas of Scotland to produce whisky, the Lowlands was highly influenced by Irish distillers, resulting in a lighter style.

Blended Scotch

Blended Scotch is the best selling type of whisky in the world. A style created by William Usher, it essentially made Scotch a household word. These days, most (but not all) blended Scotch is intended to be served on the rocks or as a mixer. Unlike blended Scotch, blended malts are comprised entirely from malted barley. Often their quality actually exceeds that of single malts as some blenders bottle to a higher standard.

Irish Whiskey

As previously mentioned, Irish monks were the first to distill whiskey, then known as "uisce beatha" and later anglicized to the word we know today. Although the paths to Ireland's proud spirit is similar to Scotland's, the way they handled it was quite different, resulting in a typically lighter style, later known as "Single Pot Still Irish Whiskey". Unions reduced the number of distilleries to two at one point, but recently there has been a flood of new independent distilleries.

American Whiskey

The U.S. originally began making whiskey in New England in the late 1700s using a rye based mash. Like Ireland and Scotland, the history that has shaped it is a very complex one as well. And though America is best known for bourbon, a revival of rye and a craft insurgence of malted barley as a primary ingredient are steadily gaining popularity.

Bourbon, Tennessee & Corn Whiskey

Although it's still widely believed bourbon must be made in Kentucky, bourbon can actually be made anywhere in the United States. Furthermore, it must use a mash comprised of over 50% corn and aged in freshly charred oak barrels. Once these requirements are met, other types of casks may be used for finishing. Tennessee Whiskey is a bourbon that usually (but not always) has added a Charcoal filtration process known as the Lincoln County Process. Worth noting, However that Tennesssee Whiskey is not legally defined nationally, but is defined in the state of Tennessee.

Rye Whiskey

Rye has been produced in the New England region of the United States for over two centuries, and that's just on record. Today's rye regulations are nearly identical to those of bourbon, with the rye component replacing corn as the main ingredient, giving it a less sweet, slightly spicier profile.

American Single Malt

The U.S. is also in a creative renaissance right now, innovating and branching out into single malts and artisan blends as well. "American Single Malt" will soon be legally defined and regulated, and there are already over 100 distilleries producing Single Malt in the U.S.

Colorado Whiskey

Stranahan's kicked off the micro distillery movement back in 2004. The number of small distilleries has grown almost exponentially since then. Colorado is now home to around 100 distilleries from everywhere from the Western Slope to right down the street.

World Whiskey

Scotland, Ireland and the US are renown the world over for producing whisky, but recently many countries are getting notoriety for their own take on it, most notably Japan. But elsewhere in the world we are starting to see accolades and prestigious awards going to other countries as well, including Israel, Wales, & Taiwan (among many others).
