

THE BURNS PUB & RESTAURANT AMERICAN WHISKEY

CURATED BY: JONATHAN ODDE

ABOUT OUR WHISKY SELECTION

This is not the largest selection in Colorado, or even the largest in the Denver-metro area. We simply don't have the space. But honestly, that's not what drives us. Each whisky is selected based on quality, uniqueness, and of course in a few cases, marketability. You will find knowledgeable experts on hand to help you select a truly satisfying spirit, so please feel free to call on one for recommendations, questions, or simply to chat. It's what we do.

HOW YOUR WHISKY IS SERVED

All of our whiskies, when not ordered in a cocktail, are served neat with a pipette of filtered water. It's assumed that you ordered the whisky to sip and allow the spirit to serenade you with the nuances and complexities the years of aging is intended to provide. Therefore, they are not served with ice (unless specified) as ice considerably restricts aroma, flavor and character. Likewise, they are not served as shots (unless specified) for essentially the same reason. With this in mind, if you wish to use ice or "shoot it", please specify this to your server.

AMERICAN WHISKEY

The U.S. originally began making whiskey in New England in the late 1700s using a rye based mash. Like Ireland and Scotland, the history that has shaped it is a very complex one as well. And though America is best known for bourbon, a revival of rye and a craft resurgence of malted barley as a primary ingredient are steadily gaining popularity.

BOURBON, TENNESSEE & CORN WHISKEY

Although it's still widely believed bourbon must be made in Kentucky, bourbon can actually be made anywhere in the United States. Furthermore, it must use a mash comprised of over 50% corn and aged in freshly charred oak barrels. Once these requirements are met, other types of casks may be used for finishing. Tennessee Whiskey is a bourbon that usually (but not always) has added a Charcoal filtration process known as the Lincoln County Process. Worth noting, however that Tennessee Whiskey is not legally defined nationally, but is defined in the state of Tennessee.

RYE WHISKEY

Rye has been produced in the New England region of the United States for over two centuries, and that's just on record. Today's rye regulations are nearly identical to those of bourbon, with the rye component replacing corn as the main ingredient, giving it a less sweet, slightly spicier profile.

AMERICAN SINGLE MALT

The U.S. is also in a creative renaissance right now, innovating and branching out into single malts and artisan blends as well. "American Single Malt" will soon be legally defined and regulated, and there are already over 100 distilleries producing American Malt in the U.S.

COLORADO WHISKEY

Stranahan's kicked off the micro distillery movement back in 2004. The number of small distilleries has grown almost exponentially since then. Colorado is now home to around 100 distilleries from everywhere from the Western Slope to right down the street.
